

SKANSKA

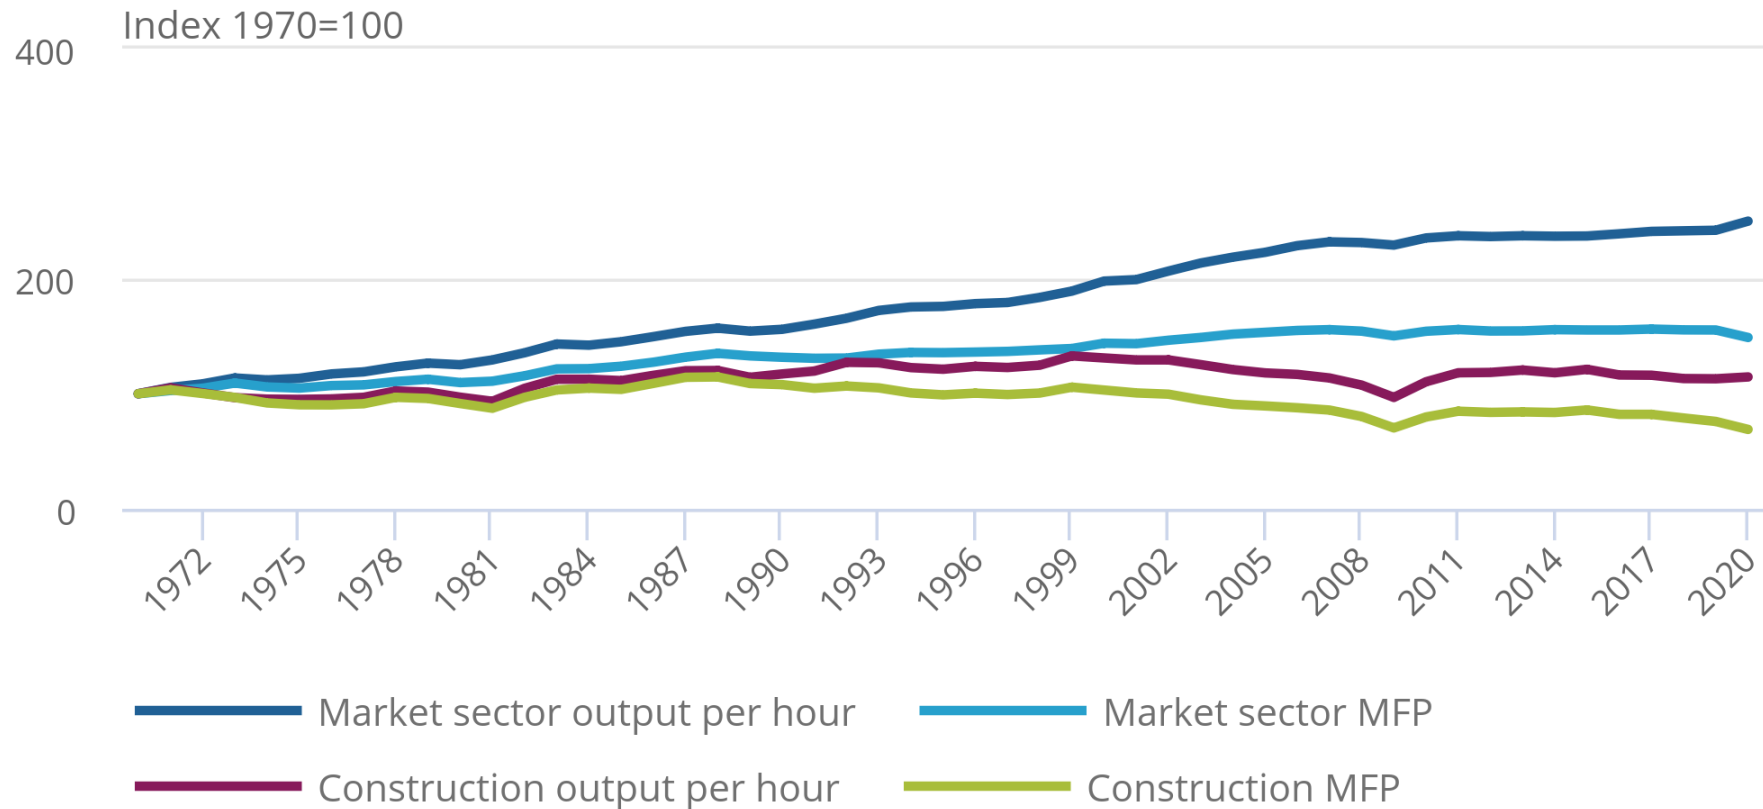

Construction productivity

Katy Dowding
President & CEO
Skanska UK

Figure 1: Productivity has changed little in the construction industry in the past 50 years

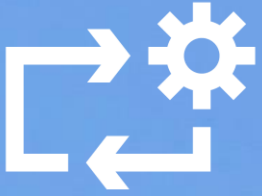

Output per hour worked and multi-factor productivity, construction industry and market sector, UK, 1970 to 2020

What needs to change?

We need to understand
our baseline

We need to create
an environment of a
productivity mindset

The whole value chain needs a productivity mindset

Focus on behaviours & culture
as much as unit of measurement

Focus less on comparison and
more on relative performance

Focus more on
blockers & enablers

Thank you

Katy Dowding
President & CEO
