# Cairn Innovation & Digital Design Toolkit

An update on Cairn Homes' pioneering digital toolkit, demonstrating the practical impact of standardised digital processes across live project

Built For Good

# Contents

1. Cairn Innovation Approach
2. What is happening currently?
3. Strategic Objectives of the Digital Design Toolkit
4. Design Toolkit - One Year on – Holybanks

# Innovation – Core Identity & Strategy 2026

## Core Identity

### Innovation with purpose

Keeping innovation in focus throughout an active industry  
Conversion to create tangible value

## Innovation Strategy

### Metrics

Develop, tangible metrics to prove results and tangible value created.

### Storytelling & Case Studies

Consistent approach to how we explain what we are doing and where we are doing it.

### Delivering Results

c. 15%

faster construction times than industry average

20,000+

tonnes of carbon reduction

50+

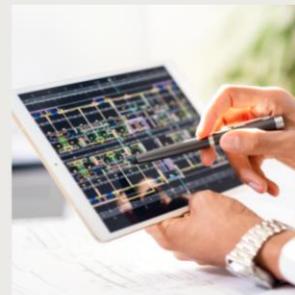

formally registered ideas in research

500+

supply chain, education and research partnerships

Case Studies *Innovation With Purpose*

<https://www.cairnhomes.com/innovation>

Cairn Technical Design Library

The Cairn Technical Library serves as single source of truth for all teams and consultants involved in our construction projects. This allows us to streamline the design process, ensure consistency and accuracy, and avoid duplication and errors. It enables us to share best practices, collaborate more effectively, and deliver high-quality outcomes for our clients.

Rapid Impact Compaction

RIC is an innovative approach to construction that offers numerous benefits, including reduced carbon emissions, reduced waste, and reduced transportation costs. By pioneering the use of RIC in Ireland, we leading the way in the adoption of innovative and sustainable construction methods.

EekoWall

Our partnership with Eekowall, an innovative and sustainable drying system, is the first use of this construction method in Ireland. Eekowall offers superior fire, acoustic and stability performance. The lightweight panels are easy to install and produce virtually no waste, and minimises noise and creates a pleasant indoor climate.

Passive House Developer Event at Seven Mills

We were proud to host a group of our industry peers at the Passive House Developer Group event at Seven Mills, co-hosted by PHAI.

# Cairn Innovation 2026 – What is Coming ?

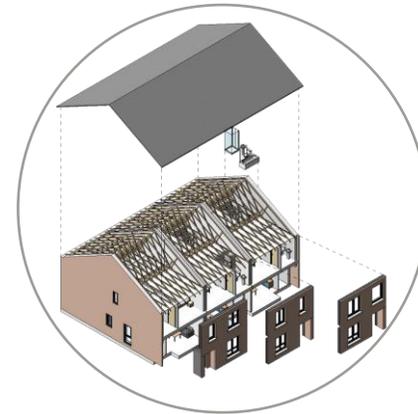

**Expanding Drone Capability**  
AI Recording Quality & Progress

*Live Q1 2026*

**Cairn Innovation Centre**  
Opening

*Live Summer 2026*

**Digital Design Toolkit**  
Live use on Projects

*Phase1 Q3 2026*

**Product Development**  
Utility Pods & External Facades

*Q1 – Q4 2026*

We have some exciting things coming this year

# Why make a Digital Design Tool kit ?

## **Structured Data**

We know that to take advantage of the next age of technology and AI, we need to first organise our data.  
AI can't make sense of unstructured information. .

## **More Effective Ways of Working**

A cloud-integrated data platform streamlines operations and enables secure, efficient information sharing and analysis across systems.

## **Downstream Capabilities**

This new type of design information allows us to better structure for future needs and capabilities, Quantities and more.

## **Protects our product**

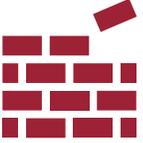

Means our homes delivery how we want them to our specifications.  
Protects our customers.

## **Sets us up for the future**

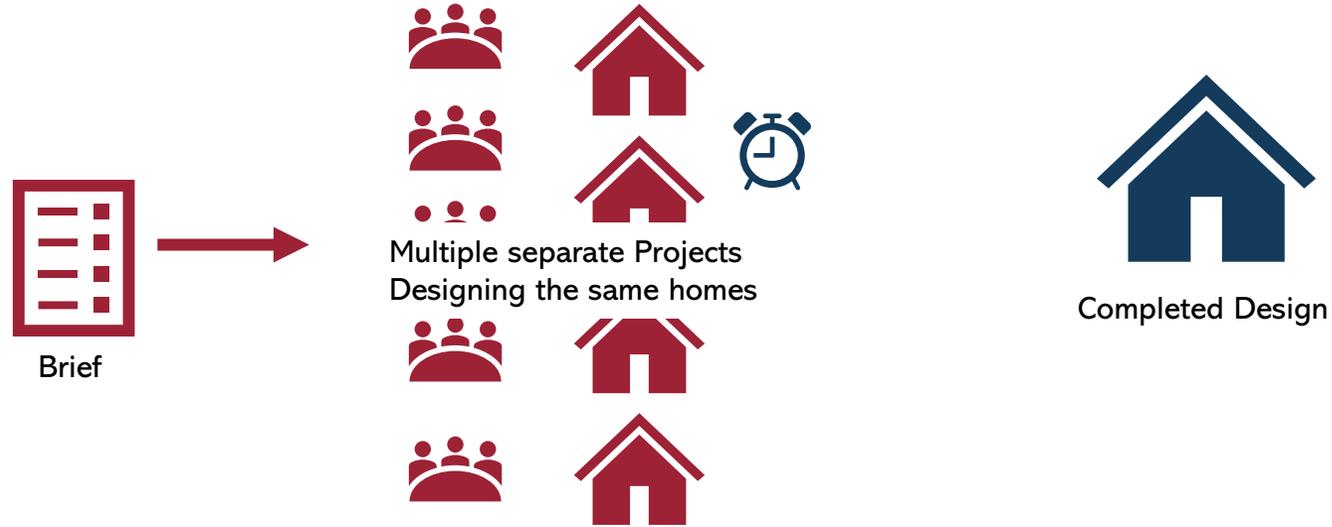

Doing this now makes sure we are ready for the next 10 years of Cairn and what we want to do and achieve

# The Cairn Way

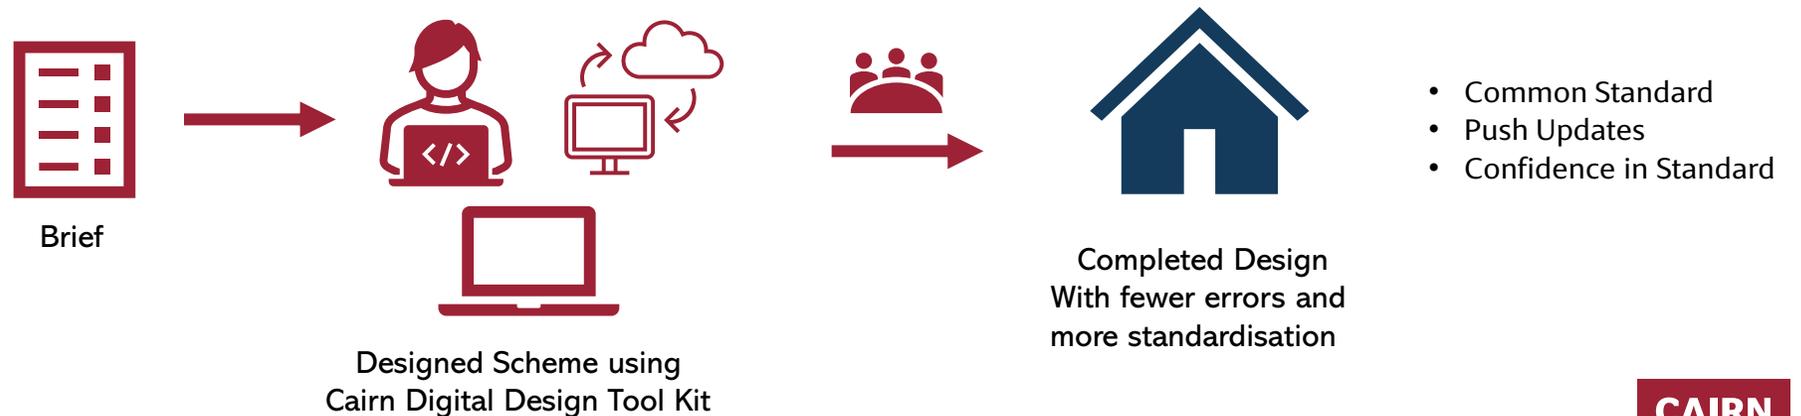

## Digital Design Tool Kits – A new way to Design

### Old Way of Working

### Cairn Design Platform

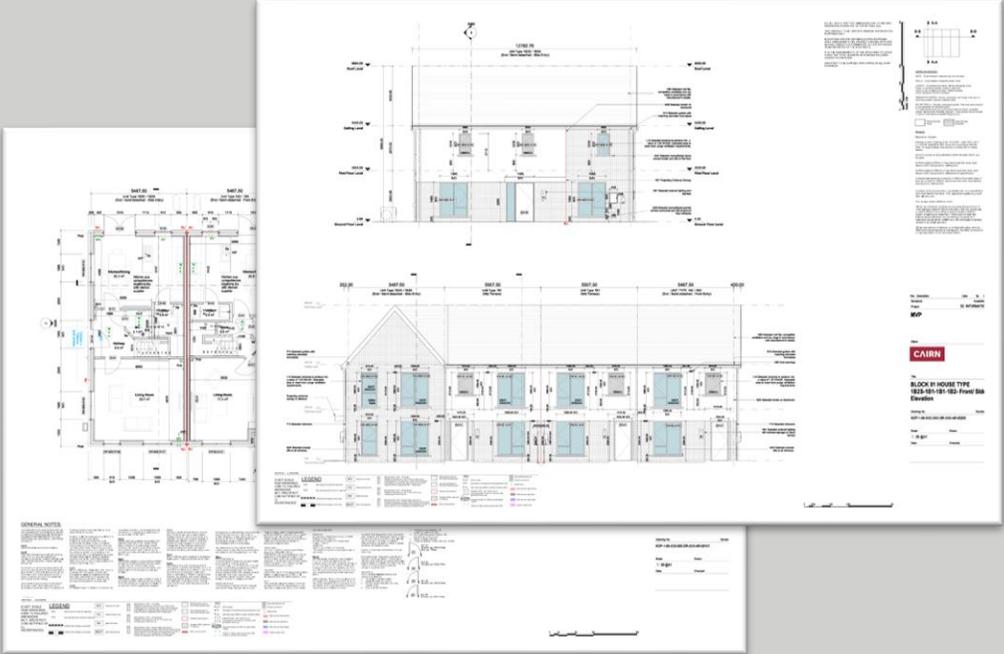

# Standardisation Debate

Update on the .....  
The Cairn Digital Design Tool Kit

**CAIRN** *Digital Design Toolkit*

# Digital Design Toolkit

# Digital Design Toolkit

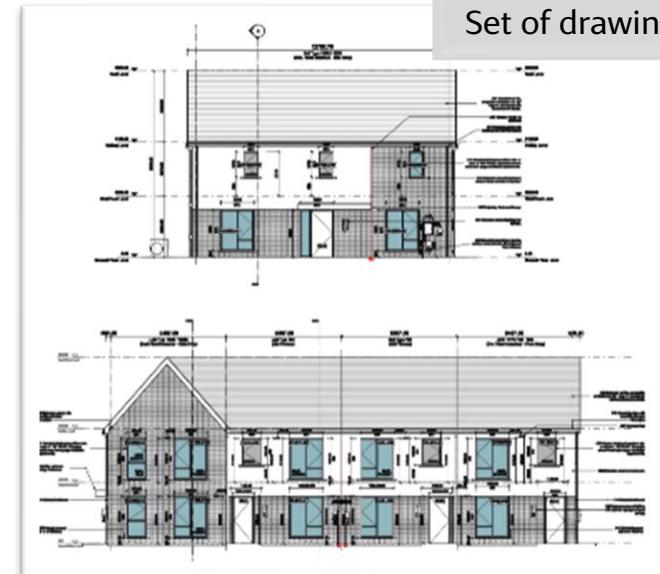

**What** – Centrally governed standard BIM models and Cairn-approved design drawings templates based on Technical Design Library.

## How does it help our projects?

- With **growing pipeline and limited resources**, the toolkit automates early design while maintaining standardisation,
- Provides **ready-to-use baseline** design for consultants,
- Frontloads **Cairn BIM Strategy**,
- Its' data-driven nature allows to integrate it with business systems and makes our design process **AI-ready**.

Set of drawings

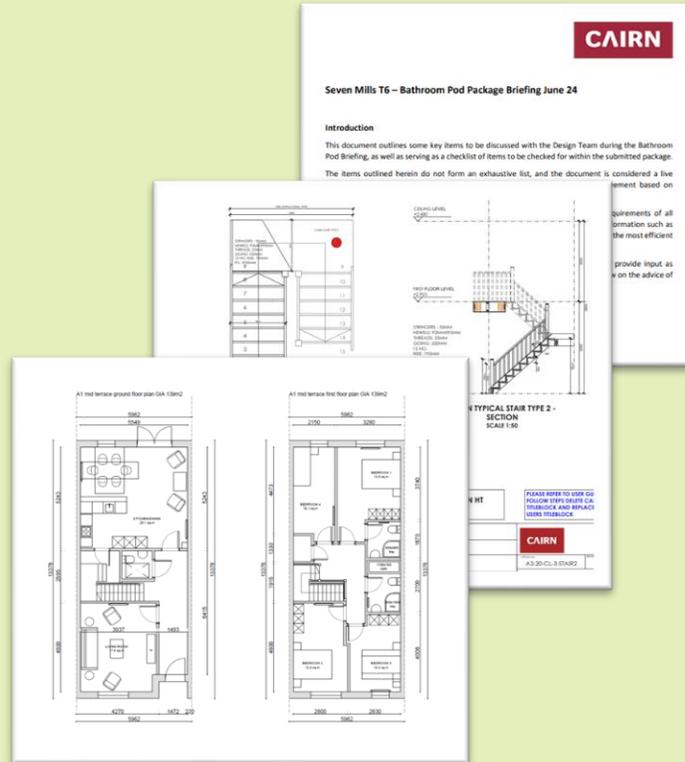

# Technical Design Library Evolution

## Technical Design Library

Contains:

- Design Standards and Processes
- Technical Information
- House type & component drawings
- Details
- Best practices

## Digital Design Toolkit

Contains:

- House type models
- Standard drawings
- 3D components
- Design automation software

Last year we were here

CAIRN

# Project Pilot

# Project

- Holybanks, Swords
- Mixed residential development:
  - 116 houses (107 standard, 9 non-standard)
  - 16 townhouses
  - 34 duplexes
  - 474 apartments
- Purpose:
  - Validate project integration
  - Understand efficiency
  - Identify improvements

---

Role	Client, Design Vision & Contractor	Passive Designer Design Toolkit Production	Principal Architect
Scope	<ul style="list-style-type: none"><li>• Issue design brief and communicate architectural and placemaking design vision for the project</li></ul>	<ul style="list-style-type: none"><li>• Produce design templates for standard houses using Digital Toolkit</li><li>• Handover templates to Reddy A+U</li></ul>	<ul style="list-style-type: none"><li>• Validate design templates and take ownership</li><li>• Integrate models/drawings into project deliverables</li><li>• Update with project-level changes</li><li>• Issue design outputs to Procure for approval</li></ul>

---

# Lessons Learned

## Strengths:

- **Accelerated design:** Toolkit templates provide ready-to-use fully dimensioned and annotated design drawings.
- **Validated process - Partnership model** emerged where Cairn supplies design template, and Architect takes ownership, manages and expands template with project-specific changes.
- **Change traceability:** issued design template can easily be compared to project design to identify uncontrolled changes.
- While designed for standardised houses, Toolkit was successfully **reused to produce design for non-standard houses** confirming value of standardised library even for non-standard design.

## Challenges:

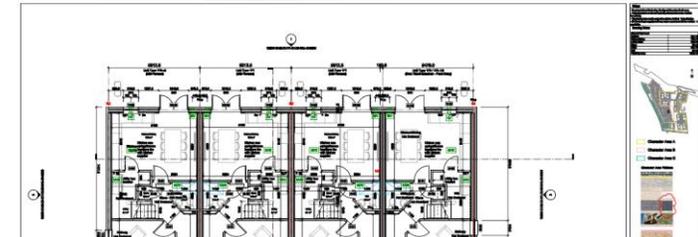

- **Window/door handing** in the schedules to be revised.

## Recommendations:

- Allow **lead architect take full ownership** of the toolkit templates even when there are project changes required.
- **Provide guidance** on how to work with the toolkit → developed training plan and User Guide.
- More input required from Civils / Landscaping Teams to product site model

- Block Arrangement Files (.rvt)**
- CAIRN House Block Type F Block H01  
(Unit Type F, Spec 1\*, Style 1, 4 Units, Front End Entrance)
  - CAIRN House Block Type F Block H02

Bill of Quantities & Cost Planning

Construction Planning

## Key takeaways

Standardisation is the foundation to using MMC at scale.

Successful innovation is achieved through transparency and collaboration with trusted partners and business functions.

Digital infrastructure is key to unlocking the next stages of innovation in construction industry.
