

Industrialising and Digitalising Construction Challenge

September 2026

Delivered by

In partnership with

The opportunity

Improved productivity

Faster delivery of higher quality homes

Reducing carbon of buildings

Strengthening regional supply chains

Accelerating digitalisation of the built environment

Training, skills and job opportunities

How will the IDCC help?

Delivery Model

Building the ecosystem, setting the rules and developing the tools.

- Develop a delivery model and supporting tools
- Digitalise the process
- Commercialise

Industrialisation and Scale Up

Scaled to build jobs, support businesses and grow capability in UK supply chains.

- Business support, skills and training
- Generate technology adoption
- Access to finance

Pathfinder

A live regional test and pull-through plan to enable adoption and scale-out to other regions.

- Social and affordable housing
- Skills and workforce development
- Accelerator hubs

Better homes

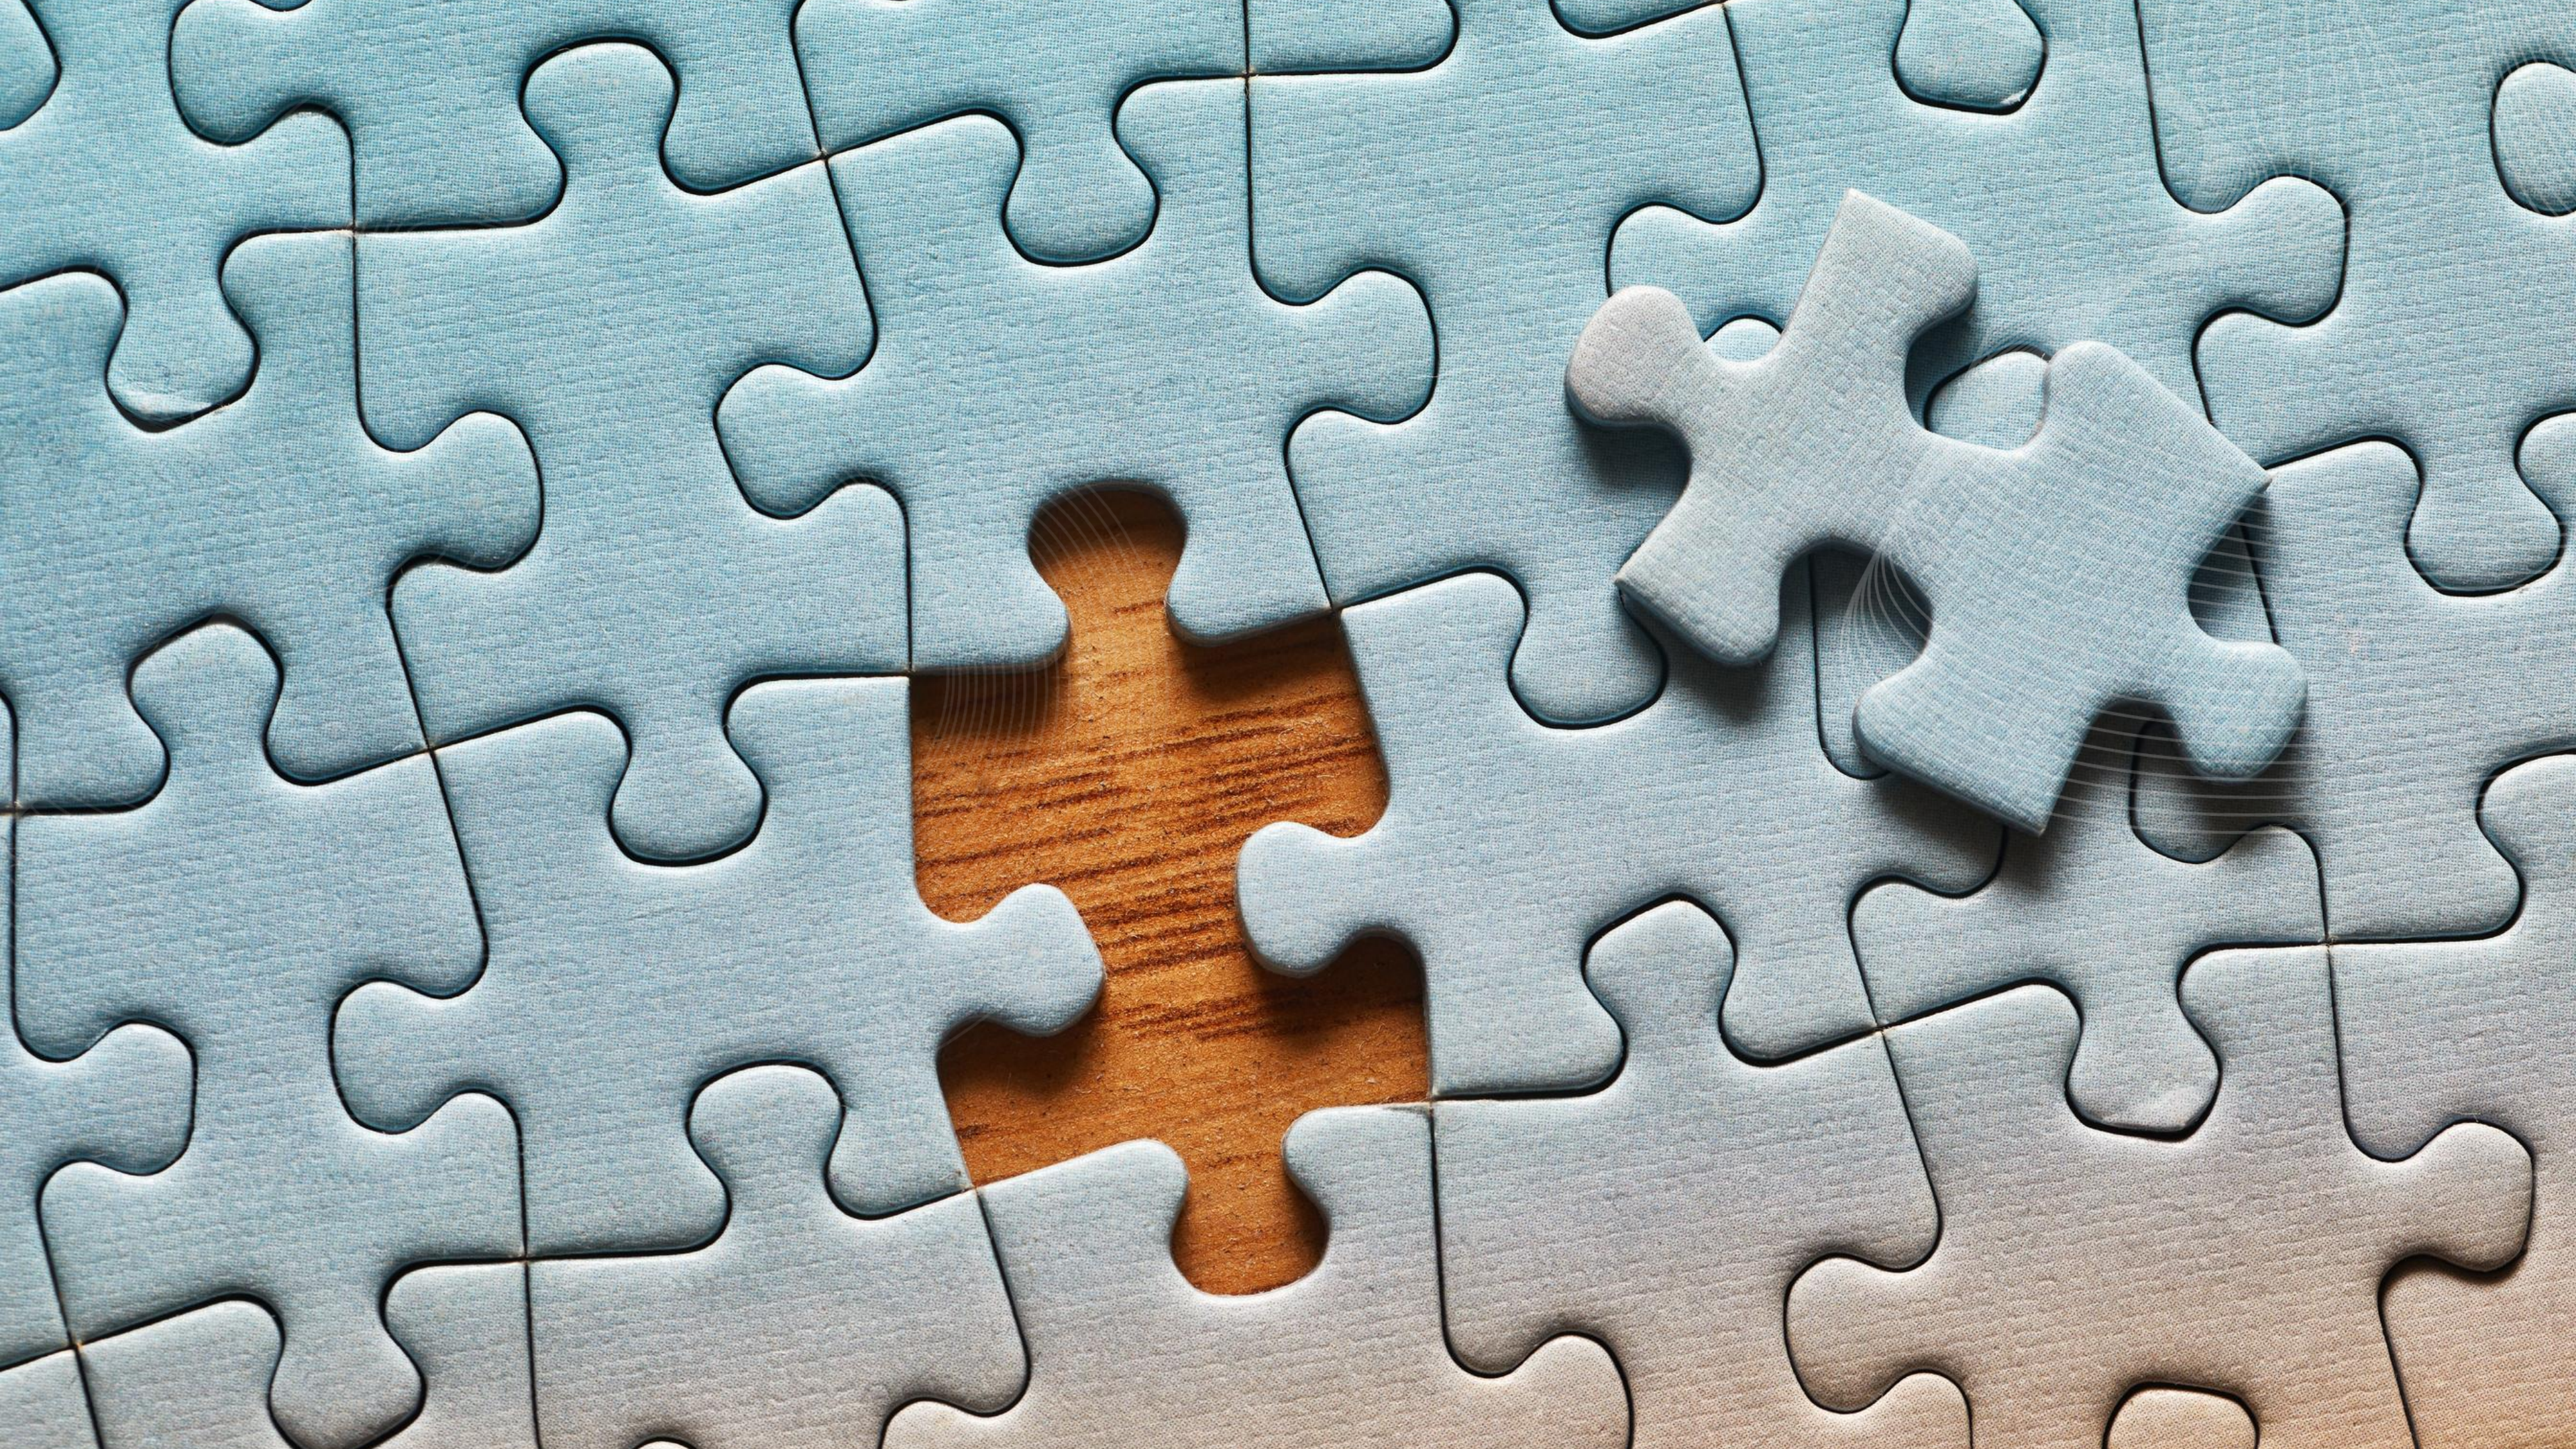

Stronger businesses

Thriving regions

A scalable, industrialised approach to transforming affordable housing delivery across the UK

The pathfinder

A Liverpool City Region where good housing and regeneration opportunities can move from ambition to delivery at pace

VISIBLE DEMAND

ALIGNED SYSTEM

CONFIDENT MARKET

DELIVERY AT SCALE

One clearer view
of housing and
regeneration
opportunities

Land
Planning
Infrastructure
Investment
Procurement

Businesses see future
demand and invest in
capacity, skills and
technology

More repeatable,
productive delivery

Regional pull-through plan

Thank you
